**To Our Customers:**

Prices quoted in this list are for the wholesale trade only and are based on current conditions, therefore subject to change without notice.

**RATES:**           5 or more trees at the   10 rate.  
                   50 or more trees at the 100 rate.  
                   500 or more trees at the 1000 rate.

**TERMS:**

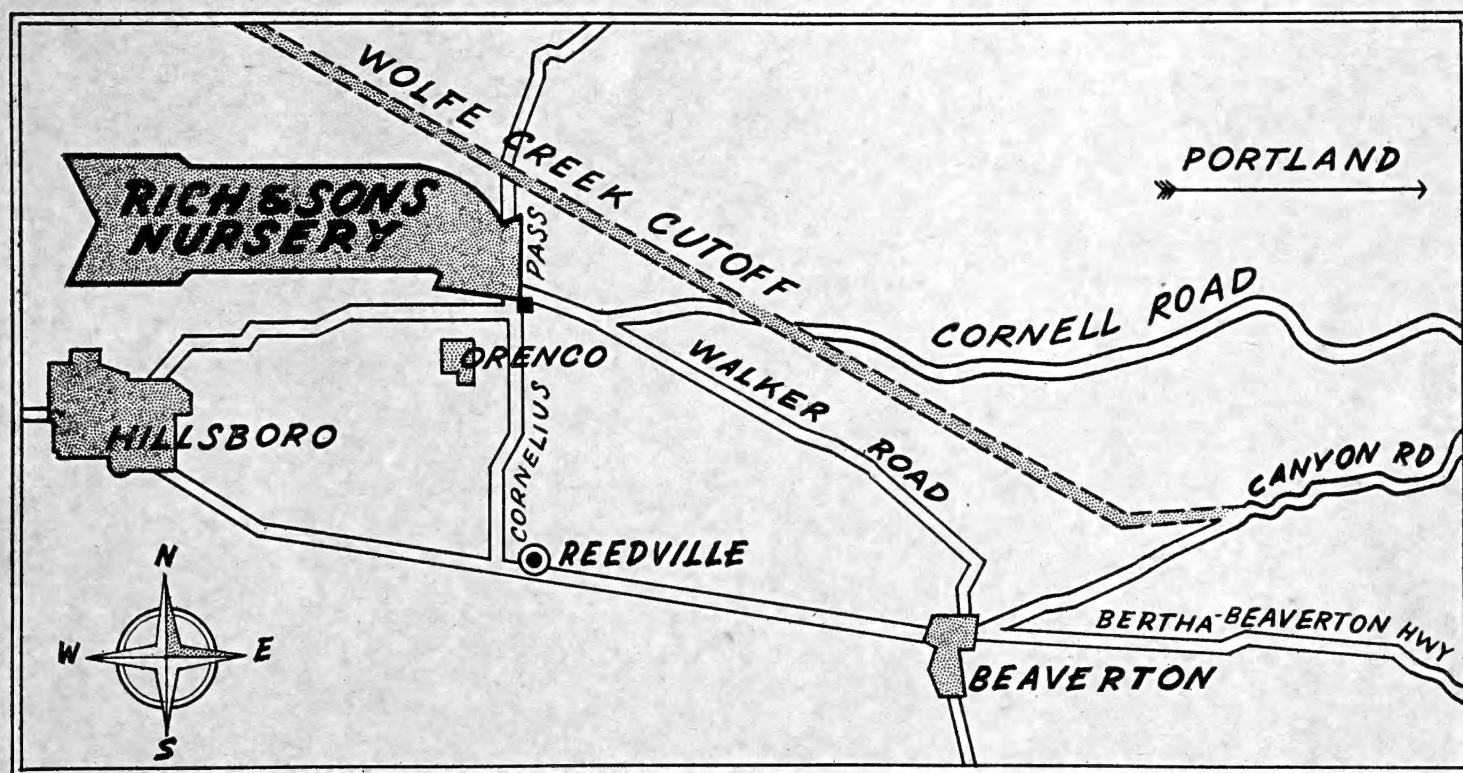

Unless otherwise stated on invoice shall be: For cash with order, no packing charge; 2% 10 days, 30 days net. Interest at the rate of 6% may be charged thereafter.

All prices quoted are F.O.B. Packing charges at cost will be added. If the full amount of the order is sent before shipping time packing charges will be waived in lieu of the 3% cash discount.

Grade standards as adopted by the American Association of Nurserymen.

Claims or complaints must be made within 10 days of receipt of shipment. Every possible effort will be made to effect a satisfactory adjustment.

**GUARANTEE:** We guarantee our stock to be true to name and as described. Any stock proving otherwise will be replaced or the purchase price refunded. In no case shall we be liable for any sum greater than the purchase price.

**LOCATION**

Our office, warehouse and sales lot are located 12 miles west of Portland on the Canyon road, and 3 miles north of Reedville at the intersection of the Walker Road and Cornelius Pass Road. Five miles east of Hillsboro.

Streamliner (Oregon Grown Only).....	6.50	30.00	55.00

This hardy, new berry, originated in the Wallowa Mountains of northeastern Oregon at an altitude of about 3,000 feet and where the temperature is subject to winter weather as low as 20 and 30 degrees below zero, is remarkable for its many unique characteristics. The strawberries start ripening at the same time the Marshalls ripen and continue (with proper irrigation) through to freezing weather in the fall. They are very large in size and hold their size well during the season. The berries are very firm and stand up on the market better than any other everbearing strawberry we know of. The color is a rich, deep red, making the fruit exceedingly attractive, both fresh and preserved. Streamliners are very sweet, requiring a minimum amount of sugar. Highly aromatic, and astonishingly productive.

**STRAWBERRIES—Everbearing (Continued)**

They produce runners, which during the course of the season will bloom and produce quite a large crop of berries. It is claimed to be the most disease-free plant known. Patches four years old have been declared in a perfect condition, free of disease and in full production. A long lived berry of exceeding merit.

**TEUCRIUM, Chamaedrys**

Shrublike plant of moderate growth. Has shrublike, shiny, dark leaves. The glossy green foliage resembling dwarf boxwood, may be used in place of boxwood where the latter is not hardy, can be clipped to suit any height up to 12 inches. Plant in fall or early spring, 6 inches apart in full sun.

3-5", 1 yr.....	.20	---
-----------------	-----	-----

**WILLOW, Blue Leaf Dwarf, Salix Nana Purpurea**

Dwarf Blue-Leaf Arctic Willow. Discovered north of the Arctic circle. A charming low-growing willow exceedingly suitable for edgings. Grows anywhere in wet or heavy soils where other plants perish. It is able to withstand the lowest temperatures encountered in this country, is of easy culture. Just the plant for low edgings around beds or along walks in difficult soils or locations. The foliage is a lovely silvery green. Can be clipped for formal effects or left natural as desired. Should be planted about 8 inches apart. May also be grown as single specimens in the foreground of the shrubbery border. About 15 to 18 inches.

HONEYSUCKLE		
Goldflame		
A superlative variety beautiful, hardy and versatile. The large flamecoral trumpets lined with gold, fragrant after nightfall, appear in immense showey clusters the same year the plant is set out. Reaching its full glory of bloom in early summer, it never-the-less flowers abundantly from May until frost. Dark blue-green foliage, disease and pest free, is attractive in itself and makes a perfect background for the brilliance of the flowers.		
Allowed to grow naturally, Goldflame will climb a trellis or spread as a ground cover; if pruned it becomes a striking specimen shrub, while if planted in a row and sheared it gives a smashing effect as an everblooming hedge.
